

Students who proudly walk out of a school's hallowed portal and go on to make a difference in their later years draw attention to their alma mater. The Trailblazers of Ashok Hall Group of Schools brings to light a myriad of encouraging stories and commendable endeavours by the capable members of the alumni. They are epic sagas of success that will inspire all who wish to embark on new journeys.

There was an overwhelming response to 'The Trailblazers' from our ever-growing alumni family. Their acknowledgements and expressed devotion to their institutions and teachers inspired the 'Sequel to the Trailblazers: Untold Memoirs'. It is an ode to their school and to their teachers who have served as the backbone for building the road that helped the students realise their dreams.

YOU ARE OUR PRIDE

Aditi Jaiswal – an ex-student of Mahadevi Birla Shishu Vihar, a prodigious archer has won numerous accolades recently. She has won gold medals in All India Inter-University Archery Championship 2021-22 organized by Chandigarh University and the 43rd State Archery Championship 2021-22 held at Bolpur SAI Archery Ground, Birbhum. We are proud to announce that she has been selected to represent India in Stage 4, World Cup Archery to be held in Columbia in July 2022.

FOOTPRINTS

Your footprints have now crossed Class-X Step forward with confidence.

On the last day of the Class X board examination, Ashok Hall Group of Schools surprised the students by gifting them a box of goodies and a refreshing drink. The students were overjoyed. The excitement on their face said it all!

A week of work, the celebration of Tagore and then Summer break! That's what May is all about.

CELEBRATING TAGORE

The month of May heralds the celebration of the great polymath and noble laureate, Rabindranath Tagore. Students and teachers paid their humble tribute to the great litterateur on his 161st birth anniversary with enthusiasm. The celebration began with the offering of flowers and lighting of the lamp. Subsequently, the school premises reverberated with the mellifluous melodies of Rabindra Sangeet and graceful Rabindra nriya. The corridors echoed with the soul stirring recitations and dramatic presentations in honour of the great teacher and visionary.

STOP CLIMATE CHANGE

PUT A TICK AGAINST THE THINGS YOU DID THIS MONTH. EACH TICK WILL MAKE THE EARTH A BETTER PLACE.

INTERESTING FACTS ABOUT CLIMATE CHANGE

- We are certain we've caused it.
- The last decade was the hottest in 125,000 years.
- The ocean absorbs most of the heat we produce.
- CO2 is at its highest in 2 million years.
- We are losing 1.2 trillion tons of ice each year.

TO DO IN SCHOOL

- Turn off lights and fans in the classroom and laboratory
- Turn off the tap after use in washroom
- Bring aluminium water bottles
- Wear reusable masks
- Use both sides of paper to write on
- Instead of throwing away extra water at the end of the day, water the plants with the same
- Use refills instead of new pens

TO DO OUT OF SCHOOL

- Plant a bottle garden or a kitchen/ balcony garden
- Use AC only when needed
- Bicycle to school if you live nearby
- Use LED bulbs and turn off computers when not in use
- Use electronics in energy saving mode
- Switch to low carbon diet
- Use public transit, avoid aeroplanes while travelling
- Reduce, Reuse, Recycle

LEGAL STUDIES

Our school offers a vast range of learning as an initiative to groom our students into better informed members of the society.

Legal studies offers an exciting learning platform that deals with human rights on one hand and property and commercial laws on the other.

Students learn about the legal system, the sources of laws across the world, the court system and the rights and responsibilities of individuals.

LET'S HYDRATE!

ALUMNI SPEAK

The students were in Kala Mandir on 5th May for the Alumni talk with ex students of the Ashok Hall Group of Schools. There were interactive sessions with successful doctors, with Vibha Batra an author, motivational speaker, advertising consultant, poet and lyricist and finally with Neha Murarka successful Career Counsellor. The doctors, Pooja Roy, Surbhi Poddar, Surabhi Goenka, Anika Agarwal and Ankit Sirohiya shared their experiences in school and also explained how they were motivated and inspired by their teachers to pursue their careers. This was followed by a question answer session. Students enjoyed Vibha Batra's session as she discussed peer pressure and family expectations in choosing a proper career. In the third part there was an interaction with Neha Murarka, a Career Counsellor, who explained how to understand one's true potential and choose a suitable career. The session had a deep impact on our young minds.

Artificial Intelligence Creating the Future

Artificial Intelligence, or AI, refers to the simulation of human intelligence into machines in order to program them to think, work and take decisions like humans beings. Our school offers us a wonderful opportunity to learn and explore the very origin of this portentous subject – inculcating its values as well as its many theories and applications in daily life. AI has honed our computer skills to a finer level, and helps us understand the greater world of computers, deep learning and machine learning. In the school library, students and teachers have access to scores of e-books which make it easier and faster for all to research and collect information on various topics. With the current flow of human achievements in the world of science and technology – AI is slowly becoming the norm, and is being ingrained into several professions. By learning the basics of the subject, we remain in step with the future and prepare ourselves for a world of machines embellished with human intelligence.
